

Peter/Zheyuan HU

University of Cambridge / Jardine Scholar / Research Assistant / Challenge Solver

✉zh369@cam.ac.uk | ☎+44 07990719841 | 🏠peterhuistyping.github.io | 🐙PeterHUistyping | 🏆Kaggle | 📄CV

Looking forward to research around Graphics / Vision / Visual Computing.

TECHNICAL SKILLS

Data Sci: Prob and Stat, Python, NumPy, ML&DL, PyTorch, Computer Vision.

Prog: C/C++, Java, OOP, CMake, Gdb, Algorithms and Data Structure, OCaml (Functional Programming).

Dev Tools: bash/shell, git, CI/CD pipeline, Docker, VS Code, Pycharm, IntelliJ IDEA.

PUBLICATION

@ **Cambridge Open Reality and Visual AI Lab**, directed by Dr **Cengiz Öztireli**. Details: 📄.

NeuMaDiff: Neural Material Synthesis via Hyperdiffusion

Nov 2024

Chenliang Zhou, **Zheyuan Hu**, *Alejandro Sztrajman*, Yancheng Cai, Yaru Liu, Cengiz Oztirel.

- Computer Graphics (real-world materials), Vision (generation via PCA, VAE, diffusion).
- Supervised by **Chenliang Zhou** (generative ML) and Dr **Alejandro Sztrajman** (materials, BRDF).

INDUSTRY RESEARCH

@ **HiSilicon Kirin chipset group**, Huawei Research Lab, **Cambridge Science Park**, UK. Details: 📄.

Research Intern: **Graphics Algorithm/GPU Architecture**

Jun 2023-Jan 2024

- Linear Algebra, Convolution (Bilateral Filter Kernel on Monte Carlo Samples using GBuffer), spatial-temporal locality.
- NN (PyTorch): Train (lr decay, shuffle data 5GB+, dropout) and Infer (conservative loss), 3D Data Encoding, etc.
- Graphics: Key developer for Ray Tracing simulation (OpenGL, GLSL, OpenMP, CMake). Host sharing sessions.
- Performance Engineer / Data structure design, targeting micro-benchmarks (performance counters, cache hit rate, etc.)
- Supervised by senior AI reseacher, PhD in math and senior GPU Architects.

Research Intern: **CPU Architecture**

Jun-Oct 2023

- Research into CPU Scheduling, DVFS policy, Idle Management in terms of energy efficiency. Convex Optimisation, Duality, LP, Pareto Optimality, Stanford CVX, Online Algorithms, Competitive Analysis, Disjoint Set Union-find, etc.
- Set up simulation, event-driven architecture with state machine, taking in runtime profiled task model. Compare different algorithms w.r.t complexity, performance, energy (temperature, thermal), Memory Contention, floor-plan, applications. Python (Numpy, Matplotlib, Networkx, Pandas, DAG, TopologicalSorter, etc).

EDUCATION

🏰 **University of Cambridge**, United Kingdom

Oct 2022-Jun 2025

Computer Science, BA. Merit-based, fully-funded **Jardine Scholarship**.

67.5% (Strong Upper Second)

🌐 **Universitas Amaiensis**, **Top 1** in Southern China, Project 985

Sep 2021-Jun 2022

Software Engineering, BE First year

rank 1/173 first term, 88/100 overall

C and C++, Object-Oriented Programming, Calculus and Linear Algebra, ACM, SSE.

HONORS & AWARDS

Gold Medal, 3D Data Compression Algorithm, **UK Tech Arena**

10 Oct-26 Nov 2022

engineering + research, digesting papers and source code, like RFC1951, etc.

- Responsible for implementation & improvement of LZSS. 6-level / concurrent LZSS Compression. 🐙 | 📄
- C with bitwise operators & hash tables, optimization via branch prediction and concurrency.
- In a team of 4, leading the team and engaging in pre-processing, serialization with teammates.

Top 2 Team, Maritime Data Science, **Mercuria Hackathon**, Switzerland

16 Dec-18 Dec 2022

regression for Route-Planning and reduce the carbon emissions of the maritime industry. 🐙 | 📄

Third Place, **High school Science and Technology Innovation Contest**, Shanghai

Apr 2020

deep research thesis into the phenomenon of tire-locking, including pros and cons using Force Analysis

- Self-made physical simulation test. Introduce Anti-lock braking system into our research with help from mentor.

Publication twice, Shanghai Students' Post

Oct 2018, May 2019

topic: Effective Ways to Overcome Obstacle in Study, Campus Life without Snack Stores.

Participant, Chinese **Physics/Mathematical** Olympiad (ChPO, CMO)

Oct 2019

PROJECTS (MORE IN APPENDIX)

Machine Learning and its applications

Oct 2022-Jan 2024

- **DNN in CV**, *Stanford CS231n*: kNN, Softmax, SVM, MLP, CNN. Caption: RNN, Attention. Gen: GAN, VAE. 🐙
- **ML**, *Stanford CS229*: Linear classifiers (Logistic Regression, GDA), SGD, Regularization, PCA, SVM. 🐙
- **Kaggle**: DataSci practice & ML model (Regression, MLP, etc), PyTorch DNN Debugging, Visualization, Validation.
- Text Classification via Naive Bayes, HMM, NLP; Social Network and Graph 🐙 | 📄

Graphics Renderer (C++, OpenGL)

Jul-Sep 2022

real-time simulation, composite design pattern for 3D objects class hierarchy with transformation.

- ray casting, normal visualization, rendering, voxel rendering, super sampling. 🐙 | 📄
- large OOP project, with 3D objects, light, camera classes, building over 20 C++ source files from scratch.

EXTRACURRICULAR INTEREST

Photography, Music, Gym, Yoga, etc | *Society*: Ethics in Science | *Econ*: Macro & Micro, Money Banking

APPENDIX: FULL PROJECTS LIST

The following Projects are either individual or collaborative, as grouped by corresponding fields.

System

Operating System (MIT 6.S081)

Oct-Dec 2022

user-mode and kernel programming of Unix V6 RISC-V multiprocessor

- implement Unix utilities, System Call. Process Scheduling, Memory (Segment, Page, VM), I/O, File. 

Database Design Management System (CMU15-445 Project)

Aug-Oct 2022

engineering and code style: Using C++ STL, Google C++ Style Guide

- Memory Management, including Buffer Pool Management System, Replacement policy: LRU
- Concurrency: implement the Parallel Buffer Pool Manager.  | 

C, C++, OOP

Multifunctional Supermarket Management System (C++)

Apr 2022

inheritance polymorphism, operator overloading, read/write files, etc.  | 

Typing Game (C EasyX)

Dec 2021

a standard keyboard layout, where different modes are provided.  | 

Front/Back-end

Weather App (Flutter, Group Project)

April-May 2023

collaborating with team members on an App integrating weather forecast with daily calendar events. I am responsible for:

- Frontend: Beautiful design with UI components, written in Flutter, with Object-oriented programming.
- Backend: Integration of iCalendar API, asynchronous IO, Computer Networking: HTTP request, get. 

🏠 **Personal Website and Blog** (React HTML CSS)

Aug 2022

project blogs, files, etc; built up from scratch using HTML/ CSS. Deployed by React, with high code reuse. 

Utility Tools

URL Finder (Web Crawler, Python, Go)

Apr 2023

download the web page available at the input URL and extract the URLs of other distinct pages linked to from the HTML.

- Data Structure: Lists, Sets; Computer Networking: HTTP request, like get; Synchronous File IO. 

Trace File Parser (Java)

May 2023

parsing trace files and generate a unique and sorted list in Java. 

Game Dev

Priest-Beneath (Unity C#)

Feb 2023

Group Project (2023 Cambridge Game Jam).  |  | [WebGL](#)

APPENDIX: REFERENCE

"Zheyuan Hu, together with AI team researcher, proposed the ray-prediction algorithm. According to the test results, the ray intersection latency in reflection scenarios can be reduced by 33%, RTU energy consumption can be reduced by 15%, or RTU throughput can be improved by 20%. The results achieved are recognized by the hardware team. This algorithm will be the official delivery technology of the HiMeta project. They have demonstrated strong algorithmic capabilities and have shown typical examples of cross-team collaboration. Well done and congratulations!" Source: [Research Center](#)

"During our time working together, I found Peter to be a highly collaborative and supportive colleague who consistently demonstrated a willingness to share his knowledge and expertise with others. Peter's ability to problem-solve complex C/C++ development issues was invaluable, and his commitment to learning and staying up-to-date with the latest advancements in his field is truly impressive. His passion for ray-tracing is contagious, and I have learned so much from his knowledge sharing." Source: [LinkedIn](#)
